

Show Garden Malzfabrik 2

Garden installation
Berlin-Schöneberg, 2018

Collaborator: Lorenza Manfredi

Reconstruction – The showgarden at the IGA International Horticultural Exhibit in Berlin-Marzahn presented the careful development and renovation project of Malzfabrik at a site apart, producing the image of a construction site that involves a great number of players, historic and contemporary elements. After the end of the garden show, the installation was rebuilt in front of Malzfabrik. The scaffolding structure allowed simple adaptations to the site and its long-term presence next to the entrance to the „Big Red One“. The funnel elements and the hues of the horizontal tubes now prove themselves as a re-count of and on the authentic site.
